

Adventure EXtreme - Paragliding Newsletter - April 2007

Paragliding excellence since 1988

Filming at Chamonix with Discovery Channel

Thermalling and XC in France

Our course schedule for the 2007 season is available on our website [Click here to view](#)

View [our blog](#) by visiting www.adventure-x.com and clicking "blog" from one of the menus. It is now updated every few days with latest news, flights of note and any other items of interest to the flying community.

Equipment - Special offers

On offer for April is the Nova Rookie - Great choice for CP's looking for a wing to go places on. Easy handling together with excellent glide and speed make this a good choice for a first or second wing. For April only we offer 10% off RRP with or without trade in. Contact us for details.

The **Nova Rookie**, DHV 1/2 is an ideal wing for ambitious CP's to flex their aviation muscles aboard. Easy launching with forgiving in flight characteristics add to the overall package.

Terry Stubbs Joins GKN Mission Everest Team

Adventure Extreme's CFI Terry Stubbs, was asked to assist the GKN Mission Everest team led by TV presenter/explorer Bear Grylls. Bear wanted Terry to train the Paramotor team planning to overfly Everest in May, to handle rough air. The group met up in Chamonix in March and had a successful training course which was filmed for Discovery Channel and Channel 4. A few days later Bear and the group decided that Terry should be asked to join the team as his Himalayan experience would be valuable to the overall success of the expedition. The group depart for Nepal on 6 May and expect to complete the trip by 30th. Discovery Channel are making a 2 hour documentary about the expedition and you can follow the groups progress from their website at www.gknmissioneverest.com and from Adventure Extreme's website and blog www.adventure-x.com

During the three weeks of Terry's absence, Sandra will be acting CFI and courses will continue as normal.

New trips include [Nepal Vol Bivi](#), [Chamonix](#) for CP+ pilots - high mountain flying; and De Aar, flatland XC flying in South Africa January '08 for experienced XC pilots only.

MOST URGENT - we repeat - Sup Air Harness Warning

21 January 2007 - FFVL Safety Notice Relating to Sup'Air Harnesses with Carbon Seat Plates. Although pertaining to the Sup'Air Alti Randonneuse XC harness, owners of **all** harnesses equipped with carbon seat plates should check for abrasion of the leg straps where they pass around the carbon seat plate. If any appreciable wear is discovered, please contact your dealer for further advice as to how to have the harness repaired. In the UK Northern Paragliding are importer for Sup Air and should be contacted in the first instance.

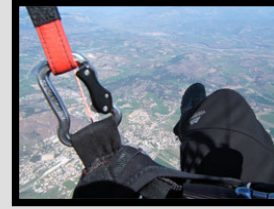

Airwave magic 4 - The Magic's three line layout offers pilots very high performance, dynamic handling and a speed system that makes a real difference into wind. Compares favourably to the Boomerang Sport but with manners. Buy one here.

Provence Hots Up 2

Cloudbases here in Provence have been consistantly high with 4000m reached yesterday 16 April, at St Vincent les Forts. Chabre has seen 3300m days but this early in the XC season, cold as always is the deciding factor. Anyone with the answer to frozen high altitude fingers share the word. So far this season we have achieved over 200 student flights with several good XC's and some excellent thermalling flights - well done to all.
